

Travel Insurance

As a pioneer in this field since 1982, our company has been remarkably successful in providing adequate medical care and assistance for Tunisians travelling abroad. By putting at their disposal the reputed network of [EUROP ASSISTANCE](#) which covers not less than 189 countries, these travelers have benefited from:

- Medical care whenever they were sick or injured during their stay abroad
- Medical assistance, including their transportation back home or to the most adequate specialized medical centers
- Transportation fees and accommodation of a close relative to be at their bedside during more than 7 days, when they were sick or injured.

More than this, we can promptly organize the transfer (even on board of medical planes) of Tunisians who wish to receive emergency treatments in foreign countries.
