

Besides caring for your present, **ASTREE** can also assist you in providing for the future. The insurance policies which we propose are designed precisely to help you plan your savings according to your budgetary possibilities and to increase them substantially, thanks to the possibility of participating in the profits resulting from our sound investment policies and able financial management.

All through the term of your policy and while your investments are building up, you benefit from a life insurance. Immediately after the expiration of the policy, **ASTREE** pays you a lump sum representing all the premiums you would have paid (your investments) , plus your share in the profits. This amount can be obtained, according to your wish, either in the form of :

- a capital (for those who opt for the policies we call **MIXTE** or the **MIXTE DYNAMIQUE**
- or a pension for life (for those who opt for the formula Known among us as **RAHATI**)

You may, also, chose a third formula which can be a combination of both.
